Wholesale Price List

Stock also listed at each and ten rates for those who desire to purchase in less than wholesale quantities

Illustrations are omitted from this REVISED ANNUAL PRICE LIST which is a compact compilation of information regarding the stock we have for sale, together with sizes and prices.

Important to Purchasers

PRICES in this catalog are for first class stock grown under most favorable conditions, dug and shipped by experienced workmen. Our prices are as low as is consistent with high quality stock, good service and economical business management. Adherance to these three CARDINAL POINTS has gained for us a high reputation which we cherish and purpose to maintain.

Single-rate prices are for less than five of a kind.

Ten-rate prices are for five or more, and less than twenty-five of a kind.

Hundred-rate prices are for twenty-five or more, and less than 250 of a kind.

Thousand-rate prices are for 250 or more of a kind.

Trees and Plants individually selected at our nurseries, will be charged for according to quoted price at time of selection.

MS. Orders from parties unknown to us should be accompained by remittance or satisfactory references. All accounts are due when bills are rendered, and prompt payment is expected. Settlements within ten days from date of invoice may take off 2% discount. TERMS.

Prices in this Catalogue supersede previous catalogue quotations and are subject to change without notice, owing to conditions not within our control.

Shipping

HE common carriers are Freight, Express, Post and Auto. Large consign-ments especially of bulky orders are usually shipped by *auto*. Where the distance is too great to make an *auto truck* advisable, shipment will be made by freight. Express, at the present reduced rates, is satisfactory for medium sized shipments where prompt delivery is required. Parcel Post is recommended only on small orders. Where no directions are given with order we ship by the method which we consider best for the purchaser.

EXING. A charge is made to cover cost, for packing, when stock is purchased at hundred and thousand rate prices, also in case of large bulky stock, and when plants are dug with carefully preserved balls of earth. No charge is made for packing on small and medium sized stock purchased at less than hundred rates, nor on stock shipped in car load lots. PACKING.

HILE we exercise the greatest care to have all the Trees, Shrubs, and Plants, etc.; genuine and believe them to be true to label and hold ourselves prepared to refund the purchase price or replace on proper proof all that prove untrue, we do not give any warranty, express or implied; and in case of any error on our part, it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for a greater amount than the original price of the goods.

Visitors are always most cordially welcome. During the spring and fall there are short intervals, however, when it is quite impossible for us to devote much time to showing parties about the nursery, as these are the most strenuous shipping periods of the entire year.

HOW TO REACH US. Our nurseries and office are located at EDGEWOOD, Edgewood Avenue, near the New Yale Bowl, just beyond Edgewood Park. Auto via Edgewood Avenue or West Chapel Street. Edgewood Trolley cars direct to Nurseries.

Transplanting Directions Preparing the Soil

No one thing is of more importance to the ultimate development of plants than thorough preparation of the soil. When the natural soil is of a poor quality, replace to a depth of about two feet with a good grade of loam. For a single plant, dig out a hole twice as large as is really necessary to contain its roots. When group plantings are to be made, dig out the whole area. Well rotted manure may be mixed into the soil to good advantage, but always avoid the use of fresh manure in contact with roots of a plant. If the natural drainage is poor, ertificial drainage must be made. artificial drainage must be made.

Planting

At the time of planting, most plants need a little shaping, both of tops and roots. Since a portion of the root system has been cut away in digging, a corre-sponding portion of the top should be removed. It is best to retain the general shape of the plant, cutting away any weak or injured branches, and about one-third of the previous year's growth from the end of each branch. Evergreens and stock dug with a ball of earth are exceptions. The root system should be examined and all split or bruised roots removed with a diagonal cut. Be careful not to set the plant too deep. Place the plant a little deeper than the point at which it is to remain, and carefully spread out all the roots (plants dug with a ball of earth excepted), now shovel in the earth until the roots are covered about two inches. Lift the plant up and down until the soil settles in well and no cavities remain. Throw in more earth and with a blunt stick work well in under the roots. Press down the soil with a firmer or the foot, beginning

in well and no cavities remain. Throw in more earth and with a blunt stick work well in under the roots. Press down the soil with a firmer or the foot, beginning at the center of the plant and working out. When the hole is filled to within three or four inches of the top, pour in two or three pailfuls of water. Allow this to disappear, and then fill the hole, leaving a slight depression around the plant. In planting evergreens or other plants dug with a ball of earth, care should be taken to prevent breaking the ball. Place the plant in the hole so that the top of the ball is not more than one inch below the level of the ground. Put in enough soil to hold the plant firmly in place.

Watering and Mulching

After a plant has been set in the ground it should be mulched with manure, leaves or lawn clippings to prevent evaporation of the soil's moisture. When mulching is unsightly or not practical, occasional thorough watering and frequent loosening of the soil serves a similar purpose. The ground around new made plant-ings should never be allowed to become dry.

After Care

Many plantings never receive the after care they require. This applies more especially to house foundation and other intensive plantings of both ever-greens and shrubs. Such plantings are often massed with the plants placed close to one another to produce immediate effects. Unless these plantings are trimmed consistently from season to season, they soon lose their original attractiveness and become ragged and overgrown, whereas if they are given proper care, they improve in appearance from season to season and can be kept within any required limitations. limitations

limitations. Deciduous shrubs should be pruned so as to remove a portion of the old wood each year, saving the new growth. By this method each plant is entirely renewed every few years. Judgment must be used in pruning so that as much of the blos-soming wood as possible will remain. This refers especially to Spiraeas, Forsythias, Japan Quinces, etc. Such shrubs as Hydrangeas, Altheas and most roses, bloom on the new growth and are improved by pruning before the spring growth begins. A little mid-summer pruning is often advantageous, especially where plants are becoming unshapely or are overgrown. Massed plantings of evergreens need careful pruning and shaping each season, otherwise the stronger growers will overcrowd the others. This trimming can be done to advantage just before the new growth starts in the spring.

with our wide experience it is probable that we can help you.

Protection

It is advisable to stake a newly planted tree in locations where the wind blows severely. The continued shaking of the tree prevents the little rootlets from getting a hold in the soil and often results in failure of a plant to grow. Suitable guards should be provided for all trees planted where exposed to horse bites, hub scars and similar injuries.

HEDGES

THE ELM CITY NURSERY COMPANY WOODMONT NURSERIES, INC.

THE present popularity of hedges as dividing lines and for ornamental plantings is the logical outcome of a rapid progress toward better gardening. DECIDIIOUS

Landscape Department

Where best results are attained in landscape and other gardening work, both experience and taste are important factors. Our landscape Department is under well equipped and expert management. We are always glad to offer suggestions without charge to intending purchasers, but where landscape problems require special visits, plans, specifications, etc., a charge is made consistent with value of services rendered. We will be pleased to take up this matter more fully with those who are interested. Ample reference from those who have and are employing us. Send for our Landscape cross-section *sketch-sheet* blank. By filling it out and returning it to us you will have supplied us such information that we can offer you valuable suggestions for which there will be no charge.

Sept. 14, 1917. "I bought of you in the spring, a Privet hedge, and had it set out on its arrival, and beg to state that it has done exceedingly well."

F. J. Lewis, Stamford, Conn.

4

'HE following lists are so arranged that quick reference can be made to sizes and prices of the stock we have to offer. We have used a popular classification, as follows:

TREES. Pages 5 to 13. Shedding foliage in the Autumn. Example, Maple.

EVERGREENS. Pages 14 to 18. Foliage remaining on tree throughout the year. Example, Norway Spruce.

BROAD-LEAF EVERGREENS. Pages 19 to 20. Foliage remaining throughout the year. Example, Rhodendrons.

SHRUBS. Pages 21 to 28. Shedding foliage in Autumn. Example, Lilac. VINES. Pages 29 to 30. Example, Wisteria.

HERBACEOUS PERENNIALS. Pages 31 to 38. Hardy permanent roots. Above the ground the growth is renewed annually. Example, Pæonia. HARDY ROSES. Pages 39 to 41.

FRUIT DEPARTMENT. General list of fruit trees and small fruits. Pages 42 to 45.

The Botanical names are inserted alphabetically in THIS TYPE, under their respective classes, and refer to the popular, common or English names.

Examples-ACER, see Maple; PICEA, see Spruce, Hibiscus, see Althea, etc.

The keen personal pleasure of knowing that one has added to the sum total of the noble trees which develop into greater beauty from year to year is worth many times all the trouble and expense involved. To be able to know that an avenue of trees or even a single tree which is growing into mature beauty and usefulness is a result of ones own personal effort is reward enough for the doing. We are conscious of the importance of trees now about us and what they represent in the practical economy and beauty of our surroundings. Some one has planted them and we are enjoying the benefit. The trees which are in their prime of beauty today will some time disappear. Will we leave for future generations a legacy at least as rich in trees as the one we are enjoying? If so, we must do our share which means Plant more trees.

"¡Trees arrived Saturday afternoon in good condition." Harry K. Bekert, Niagara Falle, N. Y.

E VERGREENS are a specialty with us and our collection includes many rare and beautiful varieties as well as a large stock of the more common sorts. We are fortunate in having soil conditions very favorable for their development, both of top and root. We transplant and root-prune all our evergreens frequently, which practically insures their successful transplanting, even the larger specimens.

COMMON AND BOTANICAL NAMES	Each	Per 10	Per 100
ABIES, see Fir. ARBORVITÆ AMERICAN (Thuja oc- cidentalis)Specimens, 5 to 20 feet, \$5.00 to Also known as White Cedar. All 6 to 7 feet. things considered this native evergreen 5 to 6 feet. and its numerous varieties is among 4 to 5 feet. our most useful of evergreens. 3 to 4 feet. THE great beauty of the broad leaf evergreens makes them most valuable for gardening purposes. Many are among our most spectacular and gorgeous flowering shrubs, while their broad, attractive leaves show out most effectively during the parts of the year when many trees and plants are without foliage. There is practically no end to the charming results that can be gained by the liberal use of this class of plants. Groupings generally give most attractive effects and the plants themselves do much better when planted this way.

Rhododendrons

Instructions for Planting

B CAUTIFUL and popular Evergreen Shrubs of easiest culture provided a little special care is taken in preparing the ground before planting and especially if a location is selected which is not exposed to the severest winter winds or the all-the-day sunshine. Rhododendrons are lovers of moderate elimatic conditions. Such a location can usually be selected. If such a one does not obtain it is perfectly practical to create it by plantings of tall growing evergreens, shrubs, etc. Rhododendrons produce the best effects when planted in groups and generous masses, either of a single color or a mixture of contrasting colors. The location where these are to be planted should first of all be well drained and if not so naturally, drainage must be arranged, as Rhododendrons will not otherwise thrive. The root system of a Rhododendron is largely made up of fine hair-like roots is long entry of a stranged, as Rhododendrons will not otherwise thrive. The root system of a Rhododendron is largely made up of fine hair-like roots. The vill not thrive if located where the soil becomes very dry for any considerable period. Following the conditions which prevail in nature where Rho-dodendrons thrive most happily, we find them at their best where the soil is mostly loose loam with a surfacing of leaf mould, conditions which permit of the soil over the entire area where the planting is to be made to a deth of at least 15 inches (2 feet is better). The move of this soil all which does not prove to be good garden loam. Replace the good soil and enough other good garden loam to amply fill in the space. The addition of five per cent. well composted manure is beneficial. Be sure to avoid line in any form as it is fatal to the roots of both Rhododendrons and Azaleas. EAUTIFUL and popular Evergreen Shrubs of easiest culture provided a little

RHODODENDRONS (Choice Garden Hybrids.)

These are the beautiful varieties usually used in the gardens and parks and which produce such a profusion of gorgeous blooms in such a variety of rich colors. The varieties we offer have all proved hardy at the Arnold Arboretum, Boston, and can be depended upon to give very satisfactory results.

HYBRID VARIETIES

WOODBINE, see Ampelopsis Quinquefolia	•				

"Was well pleased with stock received this year." Mrs. F. H. Quincy, Salina, Kansas.

February 3, 1917.

HIS department includes what are popularly known as the Old-fashion Hardy-garden Flowers as well as many of the New-fashion ones of great interest. In this class are the Paeonies, Iris, Larkspurs, Phlox, etc. The ease with which these plants can be grown, the great variety of color and long season of which these plants can be grown, the great variety of color and long season of bloom, makes them indispensable. Hardy-herbaceous-perennials are a specialty at our Nursery. The fields of Paeonies, Iris, Phlox, etc., are well worth a long journey to see and we most cordially invite all those interested in gardens to come and see them during the flowering season. The grade of stock we send out is mostly Field Grown, strong and vigorous, and will produce an abundant display of blooms

within a short time, providing suitable care is given.

The following Hardy Herbaceous Plants are offered in two sizes as follows, unless otherwise noted. Stock can be potted to order and held for any specified delivery date.

PRICES	Each	Per 10	Per 100
Strong Field Grown, or well established in pots, usual size. Smaller size (mostly field grown)	20c. 15c.	$\begin{array}{c} 1.75 \\ 1.25 \end{array}$	$15.00 \\ 10.00$

flowers. LA VALLETTE. L'INNOCENCE. Mid-season, medium to tall, good form, a clear pale blue. Mid-season, medium to tall, clear white, veined russet at base

MAD. CHEREAU. Late and tall, of beautiful and unique form; pale blue and penciled with darker blue on margin.
 PALLIDA SPECIOSA. Very late and tall. Resembles the early Florentine in its full large form. Color rich blue, being suffused with velvety royal

purple. POND POINT. Tall, very vigorous, very large and handsome, clearest deep blue.

PURPLE KING. Early, medium, large, deep purple. QUEEN OF MAY. Medium to late, tall, perfect form, clearest rose slightly buff at base, shading into clear rose veined with darker rosy-red. QUEEN VICTORIA. Mid-season, medium grower, deep yellow suffused

with rose.

SAPPHO. Mid-season, medium to low grower, very free, perfect form, royal blue.

SILVER KING. The earliest of the tall large type, of ideal full form, and when first unfolding is of the softest pale blue, white at maturity.

IRIS LÆVIGATA or KÆMPFERI (Japanese Iris).

This splendid type of Iris is one of the most important of our strictly hardy permanent garden plants. For effective habit and georgeous display of color, it stands alone at its blossoming season, which is June 20th to July 20th.

VARIETIES.

BANDI-NO-NAMI (No. 4). Double, late, tall, vigorous, pure white, desir-

BANDI-NO-NAMI (No. 4). Double, late, tail, vigorous, pure white, desirable variety.
HO-O-JO (No. 11). Double, late, tall, maroon purple splashed white.
JUNI-HITOYE (No. 9). Double, mid-season, very large, white overlaid with delicate pale rose.
KUMO-NO-NYE. Late, double, splendid form, richest velvety royal blue, suffused slightly with royal purple, brilliant yellow throat.
PYRAMID. Early to late, free bloomer, of largest size and splendid form, segments light blue at base to deep blue on margin, suffused with royal purple.

purple. SANO-WATASHI (No. 21). Mid-season, tall, pure white, very large. One

of the best. IRIS OCHROLEUCA. 3 to 4 feet. June. A noble species, large pale yellow IRIS OCHEVINE VIEW. 5 to 4 reet. 5 the. A notic species, ange pare years flowers, a most desirable variety.
 IRIS ORIENTALIS SNOW QUEEN. 2 feet. June. A handsome variety with beautiful pure white flowers, very free flowering.
 IRIS PSEUDACORUS. 3 to 5 feet. June. Very robust, flowers of medium size,

intense clear, deep yellow.

IRIS PUMILA (Hybrids).

This is a new race of charming Iris, intermediate between the early Pumila and Germanica, in time of blooming and size of flower.

VARIETIES.

ATROVIOLACEA. 6 to 10 inches. Medium dwarf, early to mid-season. Violet mauve to maroon red, paling to light on the margin. BRIDE. 12 to 15 inches. Mid-season. Ivory white, veined with green and

yellow. BRIDESMAID. 10 to 15 inches. Clear white, slightly splashed with light

blue, veined with yellow and green. CYANEA. 6 to 10 inches. Deep velvety blue, painted with white veinings. EXCELSA. 8 to 12 inches. Clearest deep yellow with slight maroon splash-

ings, beautifully veined. FAIRY. 10 to 15 inches. Pale blue to white, freely splashed with varying shades of blue from faint to the deepest blue. FORMOSA. 6 to 12 inches. Royal blue to deepest royal purple, orange at

base.

S SIBIRICA. 2 to 3 feet. June. Robust growers, foliage somewhat like the Japan Iris, flowers borne on slender stems, well up above the foliage; color, clear rich blue. Flowers are somewhat larger than our native field Iris. In bloom with the late German Iris. Very desirable and especially so for natural-IRIS SIBIRICA. izing.

FOR PRICES OF THE ABOVE HERBACEOUS PLANTS SEE PAGE 31

 IRIS SIBIRICA ALBA. Similar to preceding, but white.
 IRIS SIBIRICA FL. PL. Double form. Blooms late, with the Japan Iris.
 IRIS SIBIRICA VAR. ORIENTALIS. 2 to 3 feet. June. A beautiful Iris of the most vivid velvety deep blue, of medium size and blooming with great freedom

LARKSPUR (Delphinium). 3 to 6 feet. June to September. These handsome plants are invaluable for the hardy border, while for massing, their gorgeous effects are unrivalled. The prevailing color in the group is blue, which is the most uncommon color in Herbaceous plants, varying from the palest laven-

der to deepest purple. LIATRIS PYCNOSTACHYA (Kansas Gay Feather). 4 to 6 feet. July to August. Attractive plants, producing spikes of rosy-purple.

LILIES (Garden Varieties).

AMARYLLIS HALLI. 2 feet. July and August. Beautiful flowers in umbels. 3 to 4 inches across, of a delicate lilac pink, very attractive.
 BLACKBERRY LILY. (Belamcanda chinensis). 2 to 3 feet. June and July.
 CORAL LILY (L. tenuifolium). One of the most delicate and charming species. 1 to 2 feet high, with 1 to 15 or more nodding rich scarlet flowers.
 ELEGANS LILY. Vigorous growing, producing an abundance of bright

orange-red flowers on upright stems. GOLDEN-BANDED (L. auratum). This is a most popular lily. No species ever had so much general favor. Flowers white, with a central golden band and numerous deep purple spots. Height, 2 to 6 feet. July and August. HANSON'S (L. maculatum). Attains a height of 3 feet. Flowers reddish

band and numerous deep purple spots. Height, 2 to 6 feet. July and August.
HANSON'S (L. maculatum). Attains a height of 3 feet. Flowers reddish orange, six to ten in a cluster; petals thick and durable.
LILY OF THE VALLEY (Convallaria majalis). A popular favorite and once planted increases in beauty for many years.
MADONNA (L. candidum). Handsome, large, fragrant, pure white flowers. Easy of culture; does best when left undisturbed after planting.
SPECIOSUM RED (L. speciosum rubrum). One of the most showy of lilies of medium height and not difficult to grow in any good garden soil. Like the following other than color, which is rosy-red, beautifully marked.
SPECIOSUM WHITE (L. speciosum album). One of the best garden lilies; purest white. Very hardy.
SPECIOSUM YELLOW (L. Henryi). A beautiful deep orange-yellow variety of the preceding, easily grown and very showy. 75 cents each.
TIGER LILY VAR. SPLENDENS (L. tigrinum). This is an improved Tiger Lily and a most beautiful lily for general use.
TIGER LILY VAR. DOUBLE (L. tigrinum var. fl. pl.). Similar to above other than the flowers which are quite double. Very desirable.
TURK'S CAP (L. superbum). This native lily is one of the farest and most hardy of all lilies. It often attains a height of 6 feet, and produces a large number of flowers. Its flowers are bright orange in color with dark spots.
LOBELIA CARDINALIS (Cardinal Flower). 2 to 3 feet. August and September. Rich, fiery red flowers, handsome for the border.
LOTUS CORNICULATUS (Baby's Slippers). July to November. Bright yellow; spreading on the ground. Good foreground border plant.
LYCHNIS VISCARIA VAR. SPLENDENS (Ragged Robin). 12 to 15 inches. May and June. Produces masses of very brilliant rose-colored flowers, resembling Scotch Pinks.
LYSIMACHIA NUMMULARIA (Creeping Jenny). June and July. A splendid

May and June. Produces masses of very brilliant rose-colored flowers, resembling Scotch Pinks.
LYSIMACHIA NUMMULARIA (Creeping Jenny). June and July. A splendid cover plant. Brilliant, showy, yellow flowers.
LYTHRUM ROSEUM (Loosestrife Purple). 3 to 4 feet high. July and August. Long branching spikes of attractive pink flowers.
MALLOW SWAMP ROSE (Hibiscus moscheutos rosea). 3 to 4 feet. August and September. A tall thrifty plant desirable for a sunny place. Flowers large, rose-colored and very showy.
MALLOW VAR. CRIMSON EYE (H. moscheutos var.). 4 to 5 feet. August and September. Pure white, with deep crimson eye. Perfectly hardy either in common garden soil or very wet place.
MALLOW, RED MARVEL. Similar to the preceding, the best of this type. Bright rosy red.
MONKSHOOD (Aconitum autumnale). 5 to 6 feet. September, October.
MYRTLE BLUE (Vinca minor). One of the best evergreen plants for covering the ground.

the ground. MYRTLE WHITE (Vinca minor var. alba). A pure white variety. PACHYSANDRA TERMINALIS. 6 to 8 inches. Foliage evergreen and very much resembles our interesting native wood plant, *Princess Pine*. PACHYSANDRA TERMINALIS VARIEGATA. A variegated form.

PEONIES, see page 36. PEA PERENNIAL (Lathyrus latifolius). 5 to 6 feet. June to October. PENTSTEMON BARBATUS. July and August. 2 to 3 feet. Brilliant red tube-

like flowers in loose panicles.

Herbaceous Perennials THE ELM CITY NURSERY COMPANY WOODMONT NURSERIES, INC.

PAEONIES (Herbaceous)

THE Preony is today without a rival as the favorite of all hardy garden flowers, and quite naturally so, as no other hardy garden plant thrives with as little special care and produces so fine a display of gorgeous blooms. The great diversity of color and form, which can now be obtained with the new and improved varieties, very much increases their value.

SELECTED LIST OF VARIETIES.

The number to the left of the variety indicates the sizes we have to offer. NOTE.

- $\begin{array}{cccc} 1, & 3. \\ 1, 2, 3. \\ 1, 2, 3. \end{array}$
- ABORA. Single, early, very full. Wild rose, holding its color well. ALBATRE. Large creamy white, very free, late. BOULE DE NEIGE. White, lightly sulphured. Centre bordered with
- 1, 2, 3.

June 7, 1917. " The Paeonies that you sent last week arrived in good condition. I wish to express my appreciation of the fine plants that you sent me earlier in the season. They have all done well."

Dr. Bmma Walker, Boekfall, Cons.

PHLOX AMENA. 3 to 5 inches. April and May. Very desirable for carpeting the ground and for rockeries. Bright pink.
PHLOX DIVARICATA (Wild Sweet William). 6 to 8 inches. April and May. Lilac, showy; very attractive and desirable.
PHLOX OVATA. 5 to 6 inches. May. Low mat of evergreen foliage. Rosy pink.

PHLOX PANICULATA. Perfectly hardy, easy to make thrive, and producing gorgeous color effects. The following list has been selected from our large collection as comprising the cream of the distinct colors.

VARIETIES.

VARIETIES.
ELIZABETH CAMPBELL. Bright salmon-pink with lighter shadings, distinct eye, a much wanted shade in Phlox.
FERNAND CORTEZ. Deep crimson, very dark center.
FRAU ANTON BUCHNER. Dwarf, large trusses of pure white flowers.
GENERAL VON HEUTSZ. Medium, scarlet, shaded rose with crim-son-red eye, a very desirable variety.
INDEPENDENCE. Tall grower, fine large creamy white flowers.
L'EVENEMENT. Dwarf, bright, soft pink, tinted salmon, very showy.
MADAME MEURET. Tall, rich salmon, center deep carmine.
PANTHEON. Tall bright rose, flowers very large.
PEACH BLOW. Medium, delicate pink, rose center.
RICHARD WALLACE. Tall, pure white with bright crimson center, large flowers in immense panicles.

flowers in immense panicles. SELMA. Soft, pale rose, distinct red eye; very effective. SIEBOLD. Bright vermillion-red, over-laid with orange-scarlet, crimson-

flowers in immense panicles.
SELMA. Soft, pale rose, distinct red eyc; very effective.
SIEBOLD. Bright vermillion-red, over-laid with orange-scarlet, crimson-red eyc, very effective.
TAPIS BLANC. Large pure white flowers, very dwarf, splendid for edging Phlox beds and massing in the hardy border.
VON HOCHBERG. Tall, the ideal Crimson Phlox, the richest of its color.
PHLOX SUBULATA (Moss Pink). 3 to 4 inches. May. Forms low, flat masses of evergreen foliage. When in bloom presents a solid mass of color.
VAR. ALBA. A white form of the above.
VAR. ATRO-RUBRA. Clear deep claret.
VAR. SADIE. White, shaded with like.
PHLOX SUFFRUTICOSA (Variety Miss Lingard). White with pink eye. Blooms several weeks earlier than paniculata type.
PHYSOSTEGIA VIRGINIANA (False Dragon Head). 3 to 4 feet. July and August. Effective spikes of clear pink flowers.
PHYSOSTEGIA VIRGINIANA VAR. ALBA. A white form of above.
PINKS, SCOTCH (Dianthus deltoides). 6 to 10 inches. May and June. Pink.
PINKS, SCOTCH (Dianthus plumarius). 9 to 12 inches. May and June. Pink.
PINKS, SCOTCH (Dianthus plumarius). 9 to 12 inches. May and June. Pink.
PINKS, SCOTCH (Darnhus deltoides). 2 to 3 feet. July to Sept.
PLATYCODON GRANDIFLORUM (Balloon Flower). 2 to 3 feet. June to October. Large blue bell-like flowers.
PYARTYCODON GRANDIFLORUM VAR. ALBUM. A white form.
POPPY ORIENTAL (Papaver orientale). 2 to 3 feet. June and July.
PRIMROSE (Enothera missouriensis). July. Large yellow flowers.
PVARTYCODON GRANDIFLORUM VAR. ALBUM. A white for cut flowers.
ROCK ROSE (Helianthemum croeeum). 12 to 15 inches. Very pretty low growing evergreen plant with beautiful orange colored flowers.
RODGERSIA PODOPHYLLA. 3 feet. June and July. A stately plant.
RUDBECKIA LACINIATA (Cone Flower). 6 to 10 feet. July to September.
RUDBECKIA MAXIMA. 4 to 5 feet. Augus

Pure yellow, dark disc.
RUDBECKIA SUBTOMENTOSA (Black-Eyed Susan). 2 to 3 feet. July to October. Yellow, dark cone.
SEA HOLLY (Eryngium planum). 3 to 4 feet. July to August. Finely cut shiny foliage with thistle-like flowers of amethystine blue.
SEDUM (Steep Cran). A most interaction plane for a long to all and the statements.

SEDUM (Stone Crop). A most interesting class of plants, all easily grown and indispensable for rock-gardening.

ACRE. 2 to 3 inches. June and July. Yellow. ALBUM. 3 to 4 inches. July and August. White, red center. KAMSCHATICUM. 6 inches. June to August. Yellow flowers. OPPOSITIFOLIUM. 3 to 4 inches. July. White flower. Opposite leaved. PALLIDUM ROSEUM. 3 to 4 inches. June and July. Rosy pink flowers. PULCHELLUM. 4 to 6 inches. July and August. Rosy purple. REFLEXUM. 4 to 6 inches. July and August. Yellow flowers.

FOR PRICES OF THE ABOVE HERBACEOUS PLANTS SEE PAGE 31

SEDUM (Stone Crop)-Continued

SEDUM (Stone Crop)—Continued
SEXANGULIARE. 4 to 6 inches. June to August. Yellow flowers.
SIEBOLDI. 3 to 4 inches. August to September. Flowers bright pink.
SPECTABILE (Showy Sedum). 1 to 2 feet. September and October. A splendid garden plant, with snowy flat umbels of rosy pink.
SPECTABILE ATROPURPUREUM. 1 to 2 feet. September and October. A variety of the above with deeper colored blossoms.
SPURIUM. 4 to 6 inches. May to June. Pink flowers, trailing stems. TOMENTOSUM. 3 to 4 inches. June and July. Yellow flowers.
SEMPERVIVUM PYRENAICUM (Houseleek or Hen and Chickens). 6 inches.
SHASTA DAISY, see Daisy.
SNEEZE WEED, see Helenium.
SPIDERWORT, see Tradescantia.
SPIRÆA ARUNCUS (Aruncus sylvester). 5 to 6 feet. May and June. Creamy white. A desirable background plant for herbaceous borders.
SPIRÆA FILIPENDULA DOUBLE (Ulmaria filipendula fl. pl.). 2 to 3 feet. May and June. Beautiful fern-like foliage which remains fresh and green throughout the year. Double white flowers produced on spikes. Very graceful.
SPIRÆA JAP. VAR. GRANDIFLORA. 1 to 2 feet. May and June. Creamy white.

white.

SPIRÆA PALMATA (U. purpurea var.). 2 to 3 feet. May and June. Light

SPIRÆA PALMATA (U. purpurea var.). 2 to 3 feet. May and June. Light pink.
SPIRÆA PENTAPETALA (U. pentapetala var. fl. pl.). 2 to 3 feet. May and June. Old garden plant; pure white flowers on spikes and very attractive.
STACHYS BETONICA (Betony). 1 foot. June. Attractive, clear pink spikes.
STATICE LATIFOLIUM (Sea Lavender). 1 to 2 feet. August and September. A beautiful plant producing a cluster of broad evergreen leaves from 4 to 8 inches long, bearing small blue flowers in profusion. Thrives at seashore.
SUNFLOWER, GRACEFUL (Helianthus orgyalis). 5 to 7 feet. October and November. Tall, graceful variety, flower rich golden yellow.
SUNFLOWER, MAXIMILIAN (H. Maximiliani). 4 to 6 feet. August to October. Fine golden yellow, valuable, late flowering plant.
SUNFLOWER, MISS MELLISII (H. rigidus var.). 5 to 7 feet. July to September. Sparingly branched; rough; flowers rich yellow. One of the best.
SWEET WILLIAM, see Pinks.
THALICTRUM MINUS VAR. ADIANTIFOLIUM (Hardy Maidenhair). 1 to 2 feet. July and August. Foliage delicately arranged and graceful.
THYMUS CITRIODORA AUREA (Golden Thyme). Trailing. Orange scented.
TRADESCANTIA VIRGINIANA (Spiderwort). 1 to 2 feet. June to August. Blue; grass-like foliage.

Blue; grass-like foliage. TRADESCANTIA VIRGINIANA ALBA. White form, and very attractive. VALERIANA OFFICINALIS (Garden Heliotrope). 4 to 6 feet. June and July.

White, fragrant. An old garden favorite. VERONICA INCANA (Hoary Speedwell). 1 to 2 feet. July to September. Blue

Blue
 VERONICA LONGIFOLIA VAR. SUBSESSILIS. 2 to 3 feet. July and September. Lovely spikes of the deepest clear blue make this plant very desirable, especially at their time of blooming, when blue flowers are very rare.
 VERONICA SPICATA. 2 feet. June and July. Long spikes of blue flowers.
 VERONICA SPICATA ROSEA. 2 feet. July. Spikes of bright rose flowers.

VINCA, see Myrtle. YARROW, THE PEARL (Achillea ptarmica var. fl. pl.). 1 to 2 feet. May to

YARROW, THE PEARL (Achillea ptarmice var. il. pl.). I to 2 feet. May to October. Double white. A very effective plant, especially when in bloom.
YARROW BOULE de NEIGE (Ball of Snow). An improvement on the preceding.
YARROW, RED (A. Millefolium var.). 1 to 3 feet. June to October. Wine-red flowers, with aromatic fern-like foliage, which is very ornamental.
YARROW, WOOLLY (A. tomentosum). 8 to 10 inches. June and July. A very attractive little plant, with handsome, deeply cut foliage, and bright golden yellow flowers most suitable for the rockery.

YELLOW LILLIES, see Hemerocallis.

YUCCA FILAMENTOSA. One of the most valuable plants in cultivation for general garden and landscape planting. Its dagger-like foliage, which is evergreen, forms an attractive clump of foliage, from which appears in July and August, tall and stately spikes 3 to 6 feet high, bearing large panicles of white lillies, which are most picturesque and decorative.

FOR PRICES OF THE ABOVE HERBACEOUS PLANTS SEE PAGE 31

"Enclosed find check in payment of bill recently rendered. Perennial stock arrived in good condition, especially pleased with Yucca plants. Will advise later in regard to spring shipments."

Hybrid Perpetual Roses

This splendid class of vigorous, hardy roses is the result of crossing the favorite old garden roses with the less vigorous and less hardy tea roses. This crossing has resulted in producing a race of roses which not only bloom freely at the usual rose season, but at intervals during the summer and fall. Such favorites as the General Jaqueminot, etc., belong to this class. If restricted to a few garden-roses, one can safely select them from among the Hybrid-Perpetual class.

VARIETIES.

- Alfred Colomb. Brilliant crimson. Very large full form. Extremely fragrant.
- Anne De Diesbach. (Syn. Glory of France). Carmine, a beautiful shade:
- very large. A superior variety. Baron De Bonstetten. Rich velvety maroon; large, full. A splendid sort. Baroness Rothschild. Pale, satiny-rose,
- very large
- Captain Hayward. Crimson-carmine,
- large, full, very fine. Clio. Flowers large, of fine globular form, flesh color, shaded in the center *†Clio.
- with rosy-pink; growth vigorous. Conrad F. Meyer. Large, silvery-pink flowers, very full with delicate perfume.
- Fugene Furst. Velvety crimson, darker shadings. Large and very full.
 Fisher Holmes. Rich crimson, shaded scarlet. Large, full, and very free.
 Francois Levet. Cherry-pink; medi-tion of the state of th
- **†Francois Levet.** Cherry-pink; medi-um size; well formed; vigorous habit.
 ***†Frau Karl Druschki.** Flowers very
- large, beautiful, pure white. One of the best white hybrid perpetuals. *†General Jacqueminot. Brilliant crim-
- son; not full, but large and extremely effective; fragrant, excellent habit. **†George Arends.** A seedling of F. K. Druschki with the same free blooming
- qualities. Delicate rose-pink, large and very full.

Varieties marked * we consider a desirable collection of six. Varieties marked † we consider a desirable collection of twelve.

Other Choice Hardy Garden Roses

These are mostly the old garden favorities which are dear to the hearts of most rose lovers, and every garden can find a place for them. Blanche Moreau (Moss). Pure white, Madam Plantier. Pure white. Pro-Madam Plantier. Pure white. Pro-duced in great abundance; vigorous,

- large, full, and of perfect form. amask. Popular old-time rose of de-Damask. lightful fragrance and delicate, almost tea rose like delicacy in the opening buds. Pink.
- Harrison's Yellow. Golden-yellow, medium size, semi-double. A free bloomer.
- Species from China, early, Hugonis.
- single, pale yellow, very vigorous, \$1.00. lliet. The outside of petals an old-Juliet.
- gold, inside rosy-red.

PRICES of above Roses, Strong, 2 years old, field grown, 50 cents each, \$4.50 per 10, \$37.50 per 100, unless otherwise noted.

Roses, Native Species, Etc.

- Blanda. Single pink. Showy bright red fruits in fall. Brilliant crimson twigs in winter.
- Lucida. Dwarf, native, rose-pink. Foliage beautiful autumn coloring.
- Lucida var. White. Attractive pure white form of preceding.

\$3.00 per 10, \$25.00 per 100.

- - Hugh Dickson. Crimson shaded with scarlet, large and full.
 - J. B. Clark. Scarlet, shaded with crim-
 - son, vigorous grower. Jules Margottin. Carmine-rose, fine in open flower and in bud.
 - Pink, dis-Madame Gabriel Luizet. tinct, very large, cup shaped. Magna Charta. Pink, suffused with
 - *†Magna Charta. Pink, carmine; full globular. Margaret Dickson. O
 - Of magnificent form; white, with pale flesh center; petals very large, shell shaped. Marshall P. Wilder. Large, well formed;

PRICES of the six preceding, Strong, 2 years old, field grown, 35 cts. each,

bushy habit. Persian Yellow. nearly full. Bright yellow, small, Salet (Moss). Deep pink colored buds surrounded with a mossy fringe and crest. A fragrant and very beautiful

Rambler Roses and other Hardy Climbing Roses

With the advent of the Ramblers, we have a class of roses of such vigorous growth, that almost any garden structure can be completely festooned with an effective growth of vine, glossy foliage and an abundance of bloom rivaling the famed California gardens. To get best results with the Rambler Roses, it is necessary that they be well fertilized, as these roses are hearty feeders. This can be done to best advantage at the time the ground is being prepared for planting.

VARIETIES

- Alberic Barbier. Creamy-white, canaryyellow in center. Attractive foliage.
- American Pillar. Vigorous grower. Single, clear pink.
- Anne of Gerstein. Dark crimson. Hybrid sweet brier.
- Baltimore Belle. Pale blush, becoming nearly white; compact and fine.
- Christine Wright. A bright wild rosepink. Blooms produced singly and in clusters. Vigorous grower.
- Climbing American Beauty. Vigorous grower, hardy, blooms very large and full, color rosy-crimson.
- **Crimson Bambler.** This wonderful Japanese Rose is one of the most important and valuable acquisitions of recent years.
- Dorothy Perkins. Very double and are borne in clusters of ten to twenty. The color is a clear shell-pink.
- Ezcelsa. Known as the Red Dorothy Perkins, very full blooms of crimsonmaroon, tips of petals scarlet.
- Hiawatha. Single, bright ruby-red, white center with dark yellow anthers.
- Lady Gay. Similar to the popular Dorothy Perkins, but lighter in color.

- Multiflora. A charming species. Great clusters of white single flowers, showy red fruits which last all winter.
- Philadelphia Rambler. The blooms are larger than the Crimson Rambler and full to the center and of a deeper crimson color.
- Prairie Queen. Bright rosy-red, extra.
- Setigera. The Michigan or Prairie Rose. Large single flowers of a deep rose color.
- Source D'or. Golden-yellow. Glossy foliage, vigorous.
- Sweet Brier. Old favorite, fragrant foliage.
- Tausendschon, or Thousand Beauties. Charming, strong grower. Flowers in large clusters varying from creamypink to bright-red, all in the same cluster.
- Trier. Creamy-white with dark yellow anthers and are borne in large clusters.
- White Dorothy. Same habits of growth and freedom of flowering as Dorothy Perkins, but with pure white blooms.
- Wichuriana. Memorial rose, trailing species, pure white, single.
- William C. Egan. Bloom is large, very full, clear flesh color.

For prices, see foot of this page.

Baby Rambler and Hybrid Polyantha Roses

These dwarf bushy roses have many uses. Hardy and continuously in bloom throughout the entire growing season, they offer great opportunities. These little roses are very useful as a border or foreground in beds, or borders of taller growing sorts, for low hedges of brilliant color, and for planting in groups in the herbaceous garden, etc.

- Aennchen Muller. Brilliant carminepink.
- Baby Dorothy. Dwarf rose with large clusters of blooms, same color as the popular variety *Dorothy Perkins*.

- Erna Teschendorff. Flowers vivid crimson. Very free. One of the brightest of this type.
- Jessie. Cherry-red with white center. Very free bloomer. Compact habit.
- **Orleans.** Deep geranium-red with a showy center of white, large truss. One of the most desirable of the dwarf polyanthas.
- White Baby Bambler. (Katherine Zemet). White, very free and continuous bloomer. Compact habit.
- Yvonne Rabier. Pure white, full and free bloomer. Clean foliage. Strong grower.

PRICES of above roses, Strong 2 years old, field grown, 50 cts. each, \$4.50 per 10, \$37.50 per 100.

RUIT growing on a large scale is one of the country's profitable industries. The fortunate few who have large orchards of bearing apples and other fruit trees, which have been properly cared for, are now reaping rich rewards. No part of the United States offers better opportunities than New England for the producing of highly flavored and richly colored fruit. In a lesser way, the home are and the smaller city garden, offer opportunities for the producing of an abund-ant crop of fruit which should not be neglected. Aside from the utility feature, there is the genuine pleasure, delight and healthful recreation which is a reward for those who set out and care for a few trees, vines, and berry plants.

Apples

Summer Varieties.

- Devonshire Quarrenden. Medium size. Early, red, firm, juicy. Abundant bearer. August and September.

HOME GROUNDS

THEIR PLANNING AND PLANTING

BY PROF. L. H. BAILEY, world renowned horticaltural authority

THIS new illustrated book has just been issued and was written especially with a view of placing before the public, a brief but comprehensive book on home grounds:--their arrangement, how and what to plant. We will be pleased to send, on request, a copy with the Nursery Company's compliments to any one who has previously purchased from our Nursery, and also to others on receipt of fifty cents. This amount may be deducted from first order of not less than five dollars.

NOTE-If you do not find in this INDEX the articles you are looking for, write to us. If it is reliable hardy garden tree or plant we probably have it.

Garden Accessories

In Stone, Concrete and Wood

Not only in the formal garden, with its architectural features, but in the many and varied styles of gardens, the very variety makes gardening in America so interesting, are these garden accessories often most pleasing. Personal selections at the nursery are recommended but if not practical, we will be pleased to send photos and prices of garden-seats, bird-bowls, wurding nedertals at a set. sundial-pedestals, etc., etc.

Our New Nurseries at Woodmont, Conn.

Our new nurseries at Woodmont-bythe-Station are so rapidly developing and progress is now so well under way. that the general public will find it a very interesting and instructive place to visit from now on.

All business, however, will be transacted at our Nurseries and sales grounds at Edgewood, New Haven, Conn., until further notice.

The new Woodmont Nurseries are easily reached by auto via either Milford Turnpike or the Shore-road through Woodmont. For the ensuing year, intending visitors should arrange before-hand by appointment with our Edgewood office if they desire to be shown about the New Nurseries. To the traveler by railroad train the Nurseries are already becoming an especially attractive feature as viewed from the car window.

Quotations from a number of acknowledged authorities:

"In all New England I do not think you could find better soil and shipping facilities, advertising facilities and easy access for customers than prevail at your Woodmont Nurseries."

"I know of no location in New England so well suited for the development of an intensive and profitable nursery business as yours at Woodmont."

"Location and soil are the important features in your business, and you have them both in rare combination."

"The ideal location and fine quality of virgin soil has impressed me time and time again as I visited Woodmont. Certain success is bound to come to you in this enterprise."

The many acres of Shade Trees, Evergreens, Shrubs, Vines, Roses, Pæonies, Iris, Fruit Trees, etc., are now becoming so well established at Woodmont that the whole Nursery is already making a fine showing.
